

## Latin and Greek Prefixes: Equi- and Neo-

Many prefixes we use in English originally come from Greek or Latin words. The prefix *equi-* is from a Latin word meaning “equal.” The prefix *neo-* is from a Greek word meaning “new” or “recent.” If you understand what the prefix means, it will help you understand the meaning of the whole word. For example, the word *angular* means “relating to angles.” Combine *equi-* with *angular*, and it becomes the word *equiangular*. Based on its original meaning, *equiangular* means “relating to equal angles” or a shape that has equal angles.

Use the list in the bank to make five different English words out of *equi-* and *neo-*. You may add a suffix or change the spelling a little if needed. Write a sentence for each word you make and circle the word you made with the prefix. Be sure to use words for both *equi-* and *neo-*.

Sentences:

1.

2.

3.

4.

5.
